Washington, D.C.

Hello, L'Arche friends!

So many of you gathered at the Farmhouse in October for our groundbreaking ceremony and after-party. It was a wonderful celebration. We're deeply grateful for everyone's support.

Fencing and scaffolding went up the very next day! And now, remediation and abatement of lead paint and asbestos are underway. The process requires mild temperatures, so it's been slow-going with the winter weather. In the meantime, hundreds of sled-riders have been minding the house and its famous sledding hill.

Habitat for Humanity has also removed the items we plan to salvage and reinstall in the house (such as baseboards and moldings) and cleared out other materials to prepare the property for demolition and construction in the spring—including the tub!

Well on our way!

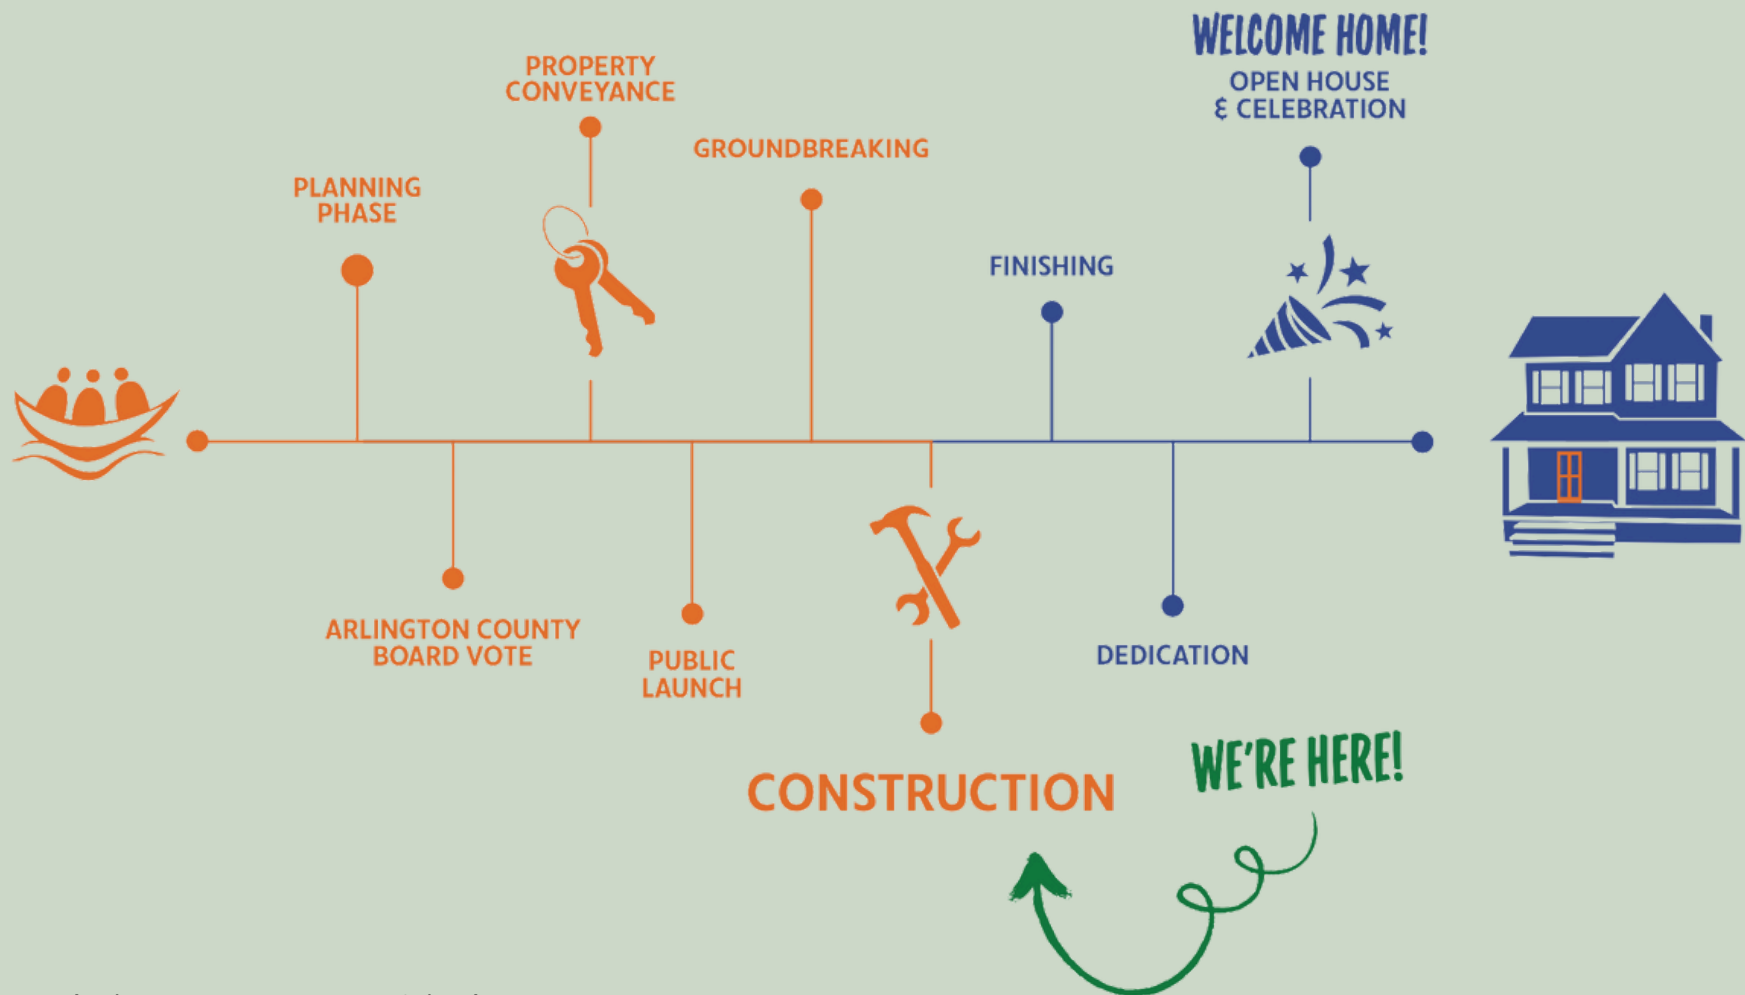

What's Next Funding To-Date

Thanks to an incredible GivingTuesday and so many generous donors, we have raised \$1.91 million to date.

That's 96% of the way to our 2 million dollar goal!
